ENVIRONMENTAL POLICY

Document nr.: 122.3 rev0

At GAZİ METAL, we regard the protection of the environment as one of our fundamental responsibilities in the course of our operations, and we uphold the following principles for a sustainable future:

- We undertake to ensure that pollution is prevented by keeping the environmental impacts arising from our activities under control,
- to comply with national and international environmental legislation and other relevant compliance obligations,
- to reduce waste generation at source, increase recycling and use natural resources efficiently,
- to improve our environmental performance by promoting the efficient use of natural resources,
- to support sustainable practices taking climate change, greenhouse gas emissions and environmental risks into account,
- to continuously improve its effectiveness and performance by integrating our Environmental Management System into all our processes,
- to support efforts to raise environmental awareness amongst our employees, suppliers and other stakeholders,
- to be prepared for environmental emergencies and take the necessary measures to minimise their potential impact,

In this regard, we are committed to continuing our operations in line with an environmentally responsible approach to production.
