ENERGY POLICY

Document nr.: 122.4 rev0

At GAZİ METAL, we regard the efficient use of energy, the continuous improvement of our energy performance and sustainable energy management as one of our core responsibilities; we adopt the following principles to foster a culture of energy efficiency:

We undertake;

- to ensure the continuous improvement of our energy performance,
- to provide the data, information and infrastructure necessary for the establishment, monitoring and review of objectives and targets aimed at improving our energy performance,
- to provide the necessary resources to improve energy performance and support the use of energy-efficient products, equipment, systems and services,
- To comply with the relevant requirements and other obligations,
- to support the identification and assessment of opportunities for improvement by measuring, monitoring and analysing our energy performance,
- to assess energy performance in new investment, process and equipment designs,
- to support our staff's awareness and competence in the area of energy efficiency and saving through the necessary training,
- to support projects developed to reduce energy consumption and improve energy efficiency in energy-intensive processes,
- to contribute to improving energy efficiency and reducing greenhouse gas emissions by capitalising on opportunities in renewable energy,

In this regard, we are committed to continuing our operations by ensuring the continuous improvement of our energy performance, increasing energy efficiency, making effective use of energy resources, and continuously enhancing the effectiveness of our Energy Management System.
