WATER POLICY

Document nr.: 122.6 rev0

At GAZİ METAL, we regard the protection and efficient use of water resources, as well as sustainable water management, as one of our core responsibilities, and we adhere to the following principles:

We undertake

- to comply with the relevant legislation, permit conditions and other compliance obligations relating to water management,
- to carry out initiatives to reduce water consumption and improve water efficiency,
- to support water recovery, water reuse schemes and the efficient use of water resources,
- to manage waste water in accordance with legal requirements and environmental obligations,
- to take the necessary measures to prevent any water pollution that may arise from our activities,
- to monitor our water performance, set targets and adopt a continuous improvement approach,
- to support efforts to raise awareness of water management amongst our employees, suppliers and other stakeholders,

In line with this, we are committed to protecting water resources, improving water efficiency and conducting our operations in accordance with the principles of sustainable water management.
